

AUDIT TARGET

01

Elm Creek Landscape and Design

elmcreeklandscape.com

OVERALL GRADE

B-

AVG 6.1 / 10

A ten-dimension audit of your website's ability to win customers across **search, mobile, AI assistants, and local discovery**. Every finding below is observed directly from your live site — nothing estimated.

02 DIMENSIONAL SCORING

Design / UX		8/10	Mobile Experience		8/10
Technical SEO		8/10	Local SEO		6/10
Content / E-E-A-T		6/10	AEO · Answer Engine		3/10
GEO · Generative		4/10	Agentic Readiness		6/10
Accessibility		6/10	CRO		6/10

Bars: **green** = strong (7–10) · **amber** = needs work (4–6) · **red** = critical (1–3). The three lowest dimensions are where you're losing the most customers right now — detailed on the following pages.

VERIFIED DIMENSIONS

The four dimensions measured directly from your live site.

SCORE DISTRIBUTION

How all ten dimensions fall across the risk bands.

03 FORGE REPORT

WHAT'S WORKING

- Professional, image-rich build. A current WordPress/Divi site with a strong gallery of real project photography and a clear landscape-design brand presence — well ahead of the typical trade site in Tulsa. (Design 8)
- Structured data is already in place. The homepage ships three JSON-LD blocks including a HomeAndConstructionBusiness entity with full address, geo-coordinates, opening hours, contactPoint and social profiles — a genuinely solid technical-SEO foundation. (Tech SEO 8)
- Contact paths work on mobile. Tap-to-call (tel:19183811663), a mailto to brian@elmcreeklandscape.com, a working contact form and a published street address all render correctly at phone widths. (Mobile 8)

WHAT'S COSTING YOU LEADS NOW

- No answer-shaped content for AI search. There is no FAQ/QAPage schema and no 40-60 word answer paragraphs, so generative engines have nothing concise to quote when a homeowner asks about Tulsa landscaping. (AEO 3)
- Reviews never appear on the site. A flawless 5.0 / 41-review reputation lives only on Google — there is no aggregateRating in the schema and no review proof on the homepage to convert visitors. (CRO 6)
- Image alt text is incomplete. Of 37 images, 12 carry no alt attribute and 8 are empty — a gap for both screen-reader users and image search. (Accessibility 6)
- No llms.txt for AI agents. robots.txt allows all crawlers, but there is no llms.txt to guide AI assistants to the most quotable facts about the business.

04 YOUR AI SEARCH BLIND SPOT

AEO + GEO · HOW MACHINES READ YOUR SITE

When a Tulsa homeowner asks an AI assistant "who does landscape design and outdoor lighting near me in Tulsa?", your site exposes a clean business entity but no answer-shaped content the model can lift. There is no FAQ schema and no short, self-contained paragraphs that directly answer common questions.

Your HomeAndConstructionBusiness JSON-LD is a real head start — most competitors lack it — but without quotable answer blocks and an aggregateRating, generative engines tend to summarise from sites that spell the answer out. **You are visible as an entity but not yet as an answer.**

```
// machine-readiness probe — answer & generative engines
FAQ / QAPage schema ..... ABSENT
Answer paragraphs (40-60 words) .... ABSENT
Entity / Organization JSON-LD ..... PRESENT   HomeAndConstructionBusiness with NAP,
geo, hours
Service-area structured data ..... PARTIAL   address + geo present; no explicit
areaServed
```

COMBINED AI VISIBILITY

A blended index of how discoverable you are to answer engines, generative search, and autonomous agents — the AI layer that increasingly sits between customers and local businesses.

05 AGENTIC & FUTURE READINESS

CAN AN AUTONOMOUS AI AGENT ACTUALLY USE YOUR SITE?

A growing share of bookings will be initiated by AI agents pulling a business's phone, hours and service area automatically. We checked how machine-readable your site is for that future:

An AI booking agent would **successfully extract your phone, email, address and hours** from the structured data — you are ahead of most local rivals here. The remaining gaps are an llms.txt file and answer-shaped content; closing them keeps you the easiest business in the area for an agent to choose.

```
// agent-access probe
Semantic HTML5 landmarks ..... PARTIAL   header/nav present; no <main> or <footer>
landmark
robots.txt bot permissions .... PRESENT   Disallow empty – all bots allowed; Yoast
sitemap listed
llms.txt ..... ABSENT   returns 404
Machine-readable NAP ..... PRESENT   name/address/phone/email in JSON-LD +
tel/mailto links
Tap-to-call & mailto hooks .... PRESENT
```

06 LOCAL COMPETITIVE POSITION

BUSINESS	GOOGLE	MOBILE CALL	SCHEMA / AI-READY	NAME / DOMAIN	OVERALL
Elm Creek Landscape (you)	5.0★ · 41	✓	✓	✓	B+
GreenPro Landscape and Design	4.9★ · 164	✓	~	✓	B
Chase Lawn & Landscape	4.8★ · 140	~	×	✓	C+

REPUTATION VS. SEARCH VISIBILITY

Reputation strength

5.0 of 5 - 41 rev

Search visibility

buried

THE DISCONNECT BETWEEN REPUTATION AND VISIBILITY

You hold a flawless **5.0 rating across 41 Google reviews** — elite social proof in a Tulsa market where rivals sit at 4.6-4.9 across far larger review counts. The technical foundation to surface that reputation is mostly in place, which makes the missing pieces unusually cheap to fix.

Yet that 5.0 appears **nowhere on the website itself** — no aggregateRating in the schema and no review proof on the homepage. The exact moment a visitor or AI assistant is deciding between you and a competitor, your strongest asset is invisible.

07 ACCESSIBILITY & COMPLIANCE

SCORE 6 / 10 · INCLUDED BECAUSE IT'S BELOW THRESHOLD

A portion of your potential customers — and Google's own ranking systems — depend on an accessible site. We found gaps that are both a legal-exposure risk and a quiet ranking drag:

```
// accessibility & compliance probe
Image alt text ..... SPARSE    12 of 37 images no alt, 8 empty
ARIA landmark roles ..... MINIMAL  23 aria-* attrs; no <main>/<footer>
Colour-contrast (text vs bg) .... ADEQUATE
Language attribute ..... ADEQUATE  <html lang> present
Skip-to-content link ..... ABSENT
```

Completing image alt text is the priority — it lifts screen-reader usability and image-search visibility in one pass, since the gallery is the site's strongest asset.

08 THE 30-DAY PLAN

WEEK 1

Surface the 5.0

Add review proof to the homepage and an aggregateRating to the existing business schema so the reputation is visible to humans, Google and AI.

WEEK 2

Open the AI door

Add FAQ/QAPage schema and 40-60 word answer paragraphs for top Tulsa landscaping questions, plus an llms.txt file.

WEEK 3

Finish accessibility

Add alt text to the 20 unlabelled images, a skip-to-content link, and proper main/footer landmarks.

WEEK 4

Convert the win

Add a sticky mobile call bar and an explicit areaServed to the schema so emergency intent and service-area searches both land.

09 BOTTOM LINE

THE ONE THING THAT MATTERS MOST

Elm Creek already runs a professional, schema-equipped site with a flawless 5.0/41-review reputation — it is in the top tier of Tulsa landscapers technically. The single highest-leverage move is making that 5.0 visible on the site and quotable to AI, via an aggregateRating, on-page review proof and answer-shaped FAQ content. Doing so converts an elite-but-hidden reputation into recovered inbound calls at the exact moment buyers and AI assistants are choosing between Elm Creek and larger rivals.
