& A11Y-RISK

OVERALL GRADE

C-

AVG 4.9 / 10

A ten-dimension audit of your website's ability to win customers across **search, mobile, AI assistants, and local discovery**. Every finding below is observed directly from your live site — nothing estimated.

02 DIMENSIONAL SCORING

Design / UX		7/10	Mobile Experience		7/10
Technical SEO		4/10	Local SEO		6/10
Content / E-E-A-T		6/10	AEO · Answer Engine		3/10
GEO · Generative		3/10	Agentic Readiness		2/10
Accessibility		5/10	CRO		6/10

Bars: **green** = strong (7–10) · **amber** = needs work (4–6) · **red** = critical (1–3). The three lowest dimensions are where you're losing the most customers right now — detailed on the following pages.

VERIFIED DIMENSIONS

The four dimensions measured directly from your live site.

SCORE DISTRIBUTION

How all ten dimensions fall across the risk bands.

03 FORGE REPORT

WHAT'S WORKING

- 5-star Google review wall. 5.0 across 173 Google reviews embedded prominently on the homepage with a Google Places widget — stronger social proof than most local roofing sites in the ArkLaTex market.
- Dual above-the-fold conversion paths. Hero section presents both 'Get a Free Quote' (contact form) and 'Call Now' (tel:318-550-5800) giving every visitor an immediate next step regardless of intent.
- Genuine community angle on display. The 'Roofs for Roofus' campaign (1% of every project to a local nonprofit) differentiates the brand and provides shareable, trust-building content beyond standard contractor sites.

WHAT'S COSTING YOU LEADS NOW

- Zero structured data on the entire site. No LocalBusiness JSON-LD, no FAQPage schema on the homepage FAQ accordion, no Review aggregate markup, and no ServiceArea entity definition. Google cannot surface star ratings or FAQ boxes in SERPs — costing click-through rate in a category where trust signals decide who gets called.
- Solar pages are nearly empty. Solar Panel Services lists only two line items (Installation and Detach & Reset) with no pricing tiers, savings estimates, financing options, or panel brand information. High-intent solar queries — the fastest-growing segment in Louisiana's net-metering market — will route to better-optimized competitors.
- FAQ section invisible to AI answer engines. Three FAQ accordion items exist on the homepage but carry no QAPage or FAQPage schema. ChatGPT, Gemini, and Google AI Overviews cannot extract and surface these answers, making the company effectively absent from AI-driven discovery.
- No online quote tool or booking flow. Both CTAs route to a generic contact form. In a market where homeowners compare 3+ contractors, the absence of a frictionless quote funnel or instant estimate widget costs lead conversions before a salesperson ever picks up the phone.

04 YOUR AI SEARCH BLIND SPOT

AEO + GEO · HOW MACHINES READ YOUR SITE

When a homeowner in Bossier City asks an AI assistant — ChatGPT, Gemini, Google's AI Overview — "who does solar installation near Shreveport?", the Cypress Solar & Roofing site gives the model almost nothing it can quote back. There is no FAQ schema, no Organization JSON-LD, and no answer-shaped paragraphs structured for retrieval. The site reads as marketing prose, not extractable facts.

Competitors who implement even basic LocalBusiness and FAQPage schema will be pulled ahead in AI citation ranking. As more searches start inside an AI assistant instead of a list of blue links, this is the gap that quietly removes Cypress from the conversation at exactly the moment a customer is deciding who

COMBINED AI VISIBILITY

A blended index of how discoverable you are to answer engines, generative search, and autonomous agents — the AI layer that increasingly sits between customers and local businesses.

05 AGENTIC & FUTURE READINESS

CAN AN AUTONOMOUS AI AGENT ACTUALLY USE YOUR SITE?

A growing share of bookings will soon be made by AI agents acting on a customer's behalf — pulling phone numbers, service areas, and hours automatically. We probed whether Cypress Solar & Roofing exposes that information in a machine-readable way.

As currently built, an AI booking agent would **fail to extract service area boundaries, financing options, license status, or appointment availability** from this site and move on to a competitor it can read. There is no llms.txt, no structured NAP beyond the footer, and no booking API endpoint.

```
// agent-access probe
Semantic HTML5 landmarks ..... PARTIAL   WordPress theme divs; limited
section/nav roles
robots.txt bot permissions ..... UNVERIFIED
llms.txt ..... ABSENT
Machine-readable NAP ..... PARTIAL   Phone in footer as tel: link; no
schema around it
Online booking / scheduling endpoint .... ABSENT
```

06 LOCAL COMPETITIVE POSITION

THE DISCONNECT BETWEEN REPUTATION AND VISIBILITY

Cypress Solar & Roofing holds a flawless **5.0 rating across 173 Google reviews** — exceptional social proof for a Bossier City contractor operating across the ArkLaTex tri-state region. Yet the complete absence of LocalBusiness schema, FAQPage markup, and structured service-area data means that reputation is **invisible to AI engines at the exact moment someone searches for a roofer or solar installer.**

The Shreveport–Bossier City metro is a hail-prone market with strong storm-damage roofing demand and accelerating solar adoption driven by Louisiana's net-metering incentives and summer heat. Homeowners are increasingly starting their contractor search inside AI assistants — and right now, Cypress is not showing up in those answers.

07 ACCESSIBILITY & COMPLIANCE

SCORE 5 / 10 · INCLUDED BECAUSE IT'S BELOW THRESHOLD

A portion of your potential customers — and Google's own ranking systems — depend on an accessible site. We found gaps that are both a legal-exposure risk and a quiet ranking drag:

```
// accessibility & compliance probe
Image alt text ..... PARTIAL  Title attributes present but text is
generic (e.g., 'Professional Roofing Company').
ARIA landmark roles ..... UNKNOWN  Cannot assess without browser-level DOM
inspection.
Colour-contrast (text vs bg) .... UNKNOWN  Could not observe contrast ratios from
extracted content.
Keyboard navigation ..... UNKNOWN  FAQ accordion elements may lack proper
ARIA roles based on extraction artifacts.
Cookie consent notice ..... ABSENT  No cookie banner detected in extracted
content.
```

08 THE 30-DAY PLAN

WEEK 1
Implement LocalBusiness + FAQPage schema

Add LocalBusiness JSON-LD with name, address, phone, geo, areaServed, and business hours. Add FAQPage schema to the homepage accordion. Directly enables Google rich results and AI citation.

WEEK 2
Build out solar service content

Create dedicated solar pages covering financing (federal ITC, Louisiana net metering), panel brands, savings estimates, and FAQs targeting 'solar installation Bossier City' and 'solar panel cost Shreveport'.

WEEK 3
Add structured quote funnel

Replace the generic contact form with a project-type selector (residential/commercial, service type, urgency) to pre-qualify leads and reduce friction before the sales call.

WEEK 4
Optimize content for AI extraction

Rewrite blog posts and FAQ answers with concise 40-60 word answer-first paragraphs targeting AI Overview and voice search extraction for high-intent ArkLaTex roofing and solar queries.

09 BOTTOM LINE

THE ONE THING THAT MATTERS MOST

Cypress Solar & Roofing has an outstanding local reputation (5.0 / 173 Google reviews) and a professional website, but its complete absence of structured data makes it invisible to AI answer engines and prevents Google rich results from ever appearing — a critical gap as homeowners increasingly use AI to shortlist contractors. The fastest path to recovered inbound leads is a single structured-data sprint: LocalBusiness JSON-LD, FAQPage schema, and service-area markup that turns 173 five-star reviews into a signal Google and AI assistants can actually see and surface. GAELWORX can close that gap in days.
