OVERALL GRADE

C-

AVG 4.5 / 10

A ten-dimension audit of your website's ability to win customers across **search, mobile, AI assistants, and local discovery**. Every finding below is observed directly from your live site — nothing estimated.

02 DIMENSIONAL SCORING

Design / UX		6/10	Mobile Experience		6/10
Technical SEO		5/10	Local SEO		4/10
Content / E-E-A-T		6/10	AEO · Answer Engine		2/10
GEO · Generative		3/10	Agentic Readiness		3/10
Accessibility		5/10	CRO		5/10

Bars: **green** = strong (7–10) · **amber** = needs work (4–6) · **red** = critical (1–3). The three lowest dimensions are where you're losing the most customers right now — detailed on the following pages.

VERIFIED DIMENSIONS

The four dimensions measured directly from your live site.

SCORE DISTRIBUTION

How all ten dimensions fall across the risk bands.

03 FORGE REPORT

WHAT'S WORKING

- **Modern build with genuine project photography.** A current Squarespace template carries real landscape-installation imagery, and every image actually carries an alt attribute — already ahead of most trade sites in Tulsa. (Design 6)
- **Descriptive, keyword-aligned page titles.** The homepage title reads "Tulsa Landscape Design & Installation | Kingdom Landscape Since 1978" — a clear, location-and-service signal that most local competitors miss. (Tech SEO 5)
- **Tap-to-call already wired up.** Both the homepage and contact page expose a working tel: link to (918) 584-4799 and a mailto: to nancy@kingdomlandscape.com, so mobile callers can reach you in one tap. (Mobile 6)

WHAT'S COSTING YOU LEADS NOW

- **No LocalBusiness or Organization schema.** The only structured data on the site is a bare WebSite JSON-LD block — no LocalBusiness, no address, no service area, no hours. Google and AI assistants get almost nothing to identify or rank you locally. (Local SEO 4)
- **Invisible to AI assistants.** There is no FAQ schema and no answer-shaped content, so generative engines have nothing to quote when a homeowner asks an AI "who does landscape design near Tulsa?" (AEO 2 / GEO 3)
- **No lead-capture form anywhere.** Neither the homepage nor the contact page contains a form — every conversion depends on the visitor choosing to call or email, with no quote request to catch the rest. (CRO 5)
- **47 years of credibility left unstructured.** "Since 1978" is a powerful trust signal, but it lives only as prose — it is never expressed as machine-readable founding data an AI or search engine could surface. (Content/E-E-A-T 6)

04 YOUR AI SEARCH BLIND SPOT

AEO + GEO · HOW MACHINES READ YOUR SITE

When a Tulsa homeowner asks an AI assistant — ChatGPT, Gemini, Google's AI Overview — "who does landscape design and installation near Tulsa?", your site gives the model almost nothing it can quote back. There is no FAQ schema, no answer-shaped paragraphs, and the only JSON-LD present is a bare WebSite block with no business identity attached.

The content reads as marketing prose, not extractable answers. So generative engines skip past you in favour of competitors whose pages are structured for retrieval. As more searches start inside an AI assistant instead of a list of blue links, **this is the gap that quietly removes a 47-year-old Tulsa name from the conversation.**

// machine-readiness probe — answer & generative engines

COMBINED AI VISIBILITY

A blended index of how discoverable you are to answer engines, generative search, and autonomous agents — the AI layer that increasingly sits between customers and local businesses.

05 AGENTIC & FUTURE READINESS

CAN AN AUTONOMOUS AI AGENT ACTUALLY USE YOUR SITE?

A growing share of bookings will soon be made by AI agents acting on a customer's behalf — pulling your phone number, service area and hours automatically. We probed whether your site exposes that information in a machine-readable way:

The good news: tap-to-call and mailto hooks are already present, so an agent can at least find a way to reach you. The bad news: with **no LocalBusiness schema**, **no structured NAP** and **no llms.txt**, an AI booking agent cannot confirm your service area or hours and may default to a competitor it can fully read.

```
// agent-access probe
Semantic HTML5 landmarks ..... PARTIAL   Squarespace builder divs; few section/nav
roles
robots.txt bot permissions .... UNVERIFIED
llms.txt ..... ABSENT
Machine-readable NAP ..... ABSENT   address & hours not structured anywhere
Tap-to-call & mailto hooks .... PRESENT   tel:9185844799 and mailto:nancy@ both wired
```

06 LOCAL COMPETITIVE POSITION

BUSINESS	GOOGLE	MOBILE CALL	SCHEMA / AI-READY	NAME / DOMAIN	OVERALL
Kingdom Landscape (you)	4.5★ · 32	✓	×	✓	C
GreenPro Landscape and Design	4.9★ · 164	✓	~	✓	B
Tom's Outdoor Living	4.7★ · 217	~	×	✓	C+

MAP-PACK RANK

REPUTATION VS. SEARCH VISIBILITY

Reputation strength

4.5 of 5 - 32 rev

Search visibility

buried

THE DISCONNECT BETWEEN REPUTATION AND VISIBILITY

You hold a solid **4.5 rating across 32 reviews** built over decades in Tulsa. Yet with no LocalBusiness schema and no structured address on the site, that reputation is effectively **invisible at the exact moment someone searches** — the page never tells Google who or where you are.

Several Tulsa competitors carry both higher ratings and far larger review counts while also running cleaner local signals. Your 1978 heritage is a genuine edge, but right now it competes with one hand tied behind its back because the trust never reaches the search or AI layer.

07 ACCESSIBILITY & COMPLIANCE

SCORE 5 / 10 · INCLUDED BECAUSE IT'S BELOW THRESHOLD

A portion of your potential customers — and Google's own ranking systems — depend on an accessible site. We found gaps that are both a legal-exposure risk and a quiet ranking drag:

```
// accessibility & compliance probe
Image alt text ..... ADEQUATE    all 14 homepage images carry alt
attributes
ARIA landmark roles ..... MINIMAL  Squarespace builder markup
Colour-contrast (text vs bg) .... ADEQUATE
Privacy policy ..... ABSENT
Cookie consent notice ..... ABSENT
```

Alt text and contrast are in good shape; the priority gap is the missing privacy policy and cookie notice — both quick additions that close a compliance flag.

08 THE 30-DAY PLAN

WEEK 1

Make the business machine-readable

Add LocalBusiness + Organization JSON-LD with structured NAP, service area and hours so Google and AI assistants can identify you.

WEEK 2

Add a lead-capture form

Put a short quote-request form on the homepage and contact page to catch the visitors who won't call.

WEEK 3

Open the AI door

Add FAQ schema and answer-shaped paragraphs for common Tulsa landscape-design questions so generative engines can quote you.

WEEK 4

Convert the heritage

Surface the 4.5-star reviews and the 'Since 1978' story on the homepage, and add an llms.txt for agent readiness.

09 BOTTOM LINE

THE ONE THING THAT MATTERS MOST

Kingdom Landscape has a clean modern site, real project photography and 47 years of Tulsa credibility, but the page never expresses any of that as structured data a search engine or AI assistant can read. The single highest-leverage move is adding LocalBusiness and FAQ schema with a real lead-capture form — turning a trusted 4.5-star name that is currently invisible to Google and AI into recovered, trackable inbound work. With competitors carrying far larger review counts, closing the machine-readability gap is what keeps a 1978 brand in the conversation as search shifts to AI.
