& A11Y-RISK

OVERALL GRADE

C-

AVG 4.4 / 10

A ten-dimension audit of your website's ability to win customers across **search, mobile, AI assistants, and local discovery**. Every finding below is observed directly from your live site — nothing estimated.

02 DIMENSIONAL SCORING

Design / UX		6/10	Mobile Experience		5/10
Technical SEO		6/10	Local SEO		4/10
Content / E-E-A-T		5/10	AEO · Answer Engine		3/10
GEO · Generative		3/10	Agentic Readiness		4/10
Accessibility		4/10	CRO		4/10

Bars: **green** = strong (7–10) · **amber** = needs work (4–6) · **red** = critical (1–3). The three lowest dimensions are where you're losing the most customers right now — detailed on the following pages.

VERIFIED DIMENSIONS

The four dimensions measured directly from your live site.

SCORE DISTRIBUTION

How all ten dimensions fall across the risk bands.

03 FORGE REPORT

▲ WHAT'S WORKING

- **Modern WordPress + Elementor build.** A current page-builder template with 15 real project photos, most carrying alt text — already cleaner than most Tulsa trade sites. (Design 6)
- **Structured data is actually present.** The homepage ships Organization + Place JSON-LD with a ContactPoint, PostalAddress and OpeningHoursSpecification — and it correctly lists 918-294-3222. (Tech SEO 6)
- **Clear service positioning & meta.** The meta description names Tulsa and the core services, and the page leads with commercial / office landscaping framing.

▲ WHAT'S COSTING YOU LEADS NOW

- **Tap-to-call dials the WRONG number.** Every tel: link on the homepage and contact page points to +1 816-683-8698 — an 816 Kansas City area code, not your Tulsa 918 line. Mobile callers who tap your number reach a wrong/foreign number and bounce. (CRO 4)
- **Two different phone numbers on the contact page.** The contact page shows both (816) 683-8698 and the correct (918) 294-3222 — a placeholder that was never replaced, undermining trust at the exact moment of intent.
- **Homepage has no H1 or H2.** The page renders zero <h1> and zero <h2> tags — only a broken-whitespace H3. Google has no clear topic signal and screen readers have no document outline. (Tech SEO 6)
- **No lead form or tap-to-call on the homepage.** The homepage carries no contact form and no working call link, so the highest-traffic page routes every visitor away to find a way to convert.

04 YOUR AI SEARCH BLIND SPOT

AEO + GEO · HOW MACHINES READ YOUR SITE

When a Tulsa homeowner asks an AI assistant "**who does commercial landscaping and lawn maintenance near me in Tulsa?**", your site gives the model only marketing prose to work with. You have Organization schema, which helps, but no FAQ/QAPage schema and no answer-shaped paragraphs an engine can lift and quote.

With no

/

outline and no extractable Q&A, generative engines struggle to summarise what you do and where, so they default to competitors whose pages are structured for retrieval. As more searches begin inside an AI assistant, this is the gap that quietly leaves you out of the answer.

COMBINED AI VISIBILITY

A blended index of how discoverable you are to answer engines, generative search, and autonomous agents — the AI layer that increasingly sits between customers and local businesses.

05 AGENTIC & FUTURE READINESS

CAN AN AUTONOMOUS AI AGENT ACTUALLY USE YOUR SITE?

A growing share of bookings will soon be placed by AI agents acting for a customer — auto-pulling your phone, hours and service area. We probed whether your site exposes that cleanly:

The good news is your JSON-LD gives an agent a correct phone number and hours. The bad news: the visible, clickable phone link is the wrong 816 number, so an agent (or human) that follows the on-page **tap-to-call hook is routed to the wrong line**. One inconsistency turns a near-pass into a fail.

```
// agent-access probe
Semantic HTML5 landmarks ..... PARTIAL   Elementor divs; no H1/H2 outline
robots.txt bot permissions .... UNVERIFIED
llms.txt ..... ABSENT
Machine-readable NAP ..... PARTIAL   schema NAP correct, but on-page tel link
wrong
Tap-to-call & mailto hooks .... PARTIAL   tel: present but points to wrong 816
number; no mailto
```

06 LOCAL COMPETITIVE POSITION

BUSINESS	GOOGLE	MOBILE CALL	SCHEMA / AI-READY	NAME / DOMAIN	OVERALL
Roark Landscape (you)	4.1★ · 47	×	✓	✓	C-
GreenPro Landscape and Design	4.9★ · 164	✓	~	✓	B+
Tom's Outdoor Living	4.7★ · 217	✓	~	✓	B

MAP-PACK RANK

REPUTATION VS. SEARCH VISIBILITY

Reputation strength

4.1 of 5 - 47 rev

Search visibility

buried

THE DISCONNECT BETWEEN REPUTATION AND VISIBILITY

You hold a **4.1 rating across 47 reviews** — credible social proof, but noticeably behind the Tulsa leaders, several of whom sit at 4.7-5.0 with well over 100 reviews. None of your Google reputation is surfaced on the homepage, so the trust you have earned does no work for visitors.

The bigger drag is consistency: a searcher who finds you and taps the number reaches the wrong 816 line, and the homepage offers no H1, form or working call link. The reputation is fine; the site is **leaking the visitors that reputation brings in**.

07 ACCESSIBILITY & COMPLIANCE

SCORE 4 / 10 · INCLUDED BECAUSE IT'S BELOW THRESHOLD

A portion of your potential customers — and Google's own ranking systems — depend on an accessible site. We found gaps that are both a legal-exposure risk and a quiet ranking drag:

```
// accessibility & compliance probe
Image alt text ..... SPARSE    10 of 15 images have alt; carousel images
unlabeled
Heading hierarchy (H1/H2) .... ABSENT    no H1 or H2 on homepage
ARIA landmark roles ..... MINIMAL
Accurate tap-to-call link .... DEAD LINK    tel: points to wrong 816 number
Cookie consent notice ..... ABSENT
```

The mislinked phone number is the priority fix — a one-line correction that stops routing mobile callers to a wrong line and removes the trust hit; restoring an H1/H2 outline is the close second.

08 THE 30-DAY PLAN

WEEK 1	WEEK 2	WEEK 3	WEEK 4
Stop the bleeding Correct every tel: link to (918) 294-3222 and remove the stray 816 number so tap-to-call actually reaches you.	Fix the foundation Add a proper H1 and H2 outline to the homepage and place a lead form plus a sticky mobile call bar.	Open the AI door Add FAQ/QAPage schema, answer-shaped paragraphs and service-area data so assistants can quote you.	Convert the win Surface your Google reviews on the homepage and label remaining carousel images for accessibility and SEO.

09 BOTTOM LINE

THE ONE THING THAT MATTERS MOST

Roark Landscape runs a modern WordPress build with valid Organization schema, yet its homepage has no H1 and every clickable phone number dials a wrong 816 Kansas City line. The single highest-leverage move is correcting the tap-to-call number and restoring a heading outline, so mobile searchers actually reach you instead of bouncing. With Tulsa competitors sitting at 4.7-4.9 stars and hundreds of reviews, fixing these self-inflicted leaks is the difference between a 4.1-rated site that loses calls and one that converts the demand it already attracts.
