01

SolarWise Energy Solutions

solarwiseenergy.com

< AGENT-BLIND

OVERALL GRADE

C-

AVG 4.5 / 10

A ten-dimension audit of your website's ability to win customers across **search, mobile, AI assistants, and local discovery**. Every finding below is observed directly from your live site — nothing estimated.

02 DIMENSIONAL SCORING

Design / UX		5/10	Mobile Experience		6/10
Technical SEO		5/10	Local SEO		4/10
Content / E-E-A-T		6/10	AEO · Answer Engine		3/10
GEO · Generative		3/10	Agentic Readiness		3/10
Accessibility		5/10	CRO		5/10

Bars: **green** = strong (7–10) · **amber** = needs work (4–6) · **red** = critical (1–3). The three lowest dimensions are where you're losing the most customers right now — detailed on the following pages.

03 FORGE REPORT

WHAT'S WORKING

- **Real credentials, stated plainly.** The footer carries a live FL contractor license (EC13009994) and the About page names NABCEP-certified, factory-trained installers supervised by an in-house electrical contractor — genuine E-E-A-T most solar sites bury or omit. (Content 6)
- **Tap-to-call wired up.** The (727) 486-2938 number is a real tel: link in the header on every page, so a phone tap dials directly on mobile. (Mobile 6)
- **Clear service architecture.** Distinct pages for Our Projects, Our Process, Solar 101 and Contact give visitors and crawlers a clean map, and a contact form with name/email/message is actually present on the contact page. (CRO 5)

WHAT'S COSTING YOU LEADS NOW

- **GoDaddy placeholder is leaking onto live pages.** The account widget renders "Signed in as: filler@godaddy.com" and the source still ships a filler@godaddy.com address — an unfinished template artifact that signals an abandoned build to both visitors and Google. (Design 5)
- **Self-describing schema is broken.** The LocalBusiness JSON-LD exists but its @id is a malformed auto-generated string (http://5dbc81eb.e104.46c4...com) and the url field drops its scheme, so the one structured block on the site can't be trusted by search or AI. (Tech SEO 5)
- **Headline sells nothing.** The homepage H1 is a generic "Get Started Today!" rather than the actual differentiators — Lifetime Warranty, NABCEP-certified, statewide — wasting the single most-read line on the page. (CRO 5)
- **No machine-readable answers for AI search.** There is no FAQ/QAPage schema and no answer-shaped copy, so when a Tampa homeowner asks an assistant "who installs solar with a lifetime warranty near me," the model has nothing to quote. (AEO 3)

04 YOUR AI SEARCH BLIND SPOT

AEO + GEO · HOW MACHINES READ YOUR SITE

When a Tampa homeowner asks an AI assistant — ChatGPT, Gemini, Google's AI Overview — **"who's a NABCEP-certified solar installer near Tampa?"**, your site gives the model almost nothing structured to quote back. The single LocalBusiness JSON-LD block is broken (a malformed @id), there's no FAQ schema, and the strong proof points — lifetime warranty, licensed in-house electrician, all 67 Florida counties — sit in prose the model can't reliably extract.

The page reads as marketing copy, not retrievable answers. So generative engines skip past you toward competitors whose pages are structured for machines. As more solar research starts inside an AI assistant, **this is the gap that quietly drops you out of the shortlist.**

COMBINED AI VISIBILITY

A blended index of how discoverable you are to answer engines, generative search, and autonomous agents — the AI layer that increasingly sits between customers and local businesses.

05 AGENTIC & FUTURE READINESS

CAN AN AUTONOMOUS AI AGENT ACTUALLY USE YOUR SITE?

A growing share of solar quote requests will soon be initiated by AI agents acting for a homeowner — pulling your phone, service area and hours automatically. We probed whether your site exposes that cleanly for a machine:

An agent would find the tap-to-call number and a basic LocalBusiness block, but the broken schema @id, the leaking GoDaddy placeholder identity, and the absence of llms.txt or structured service-area data mean it would **struggle to confirm who you are and where you work** — and may move to a competitor it can read with confidence.

```
// agent-access probe
Semantic HTML5 landmarks ..... PARTIAL   GoDaddy builder divs; few section/nav roles
robots.txt bot permissions .... UNVERIFIED
llms.txt ..... ABSENT
Machine-readable NAP ..... PARTIAL   address in JSON-LD but identity polluted by
filler@godaddy.com
Tap-to-call & mailto hooks .... PRESENT   tel: in header, mailto
info@solarwiseenergy.com on contact page
```

06 LOCAL COMPETITIVE POSITION

BUSINESS	GOOGLE	MOBILE CALL	SCHEMA / AI-READY	NAME / DOMAIN	OVERALL
SolarWise Energy (you)	4.6★ · 85	✓	~	✓	C
Lunex Power	4.8★ · 622	✓	~	✓	B
Tampa Bay Solar	4.7★ · 384	✓	~	✓	B-
Coast To Coast Solar	4.7★ · 187	~	~	✓	C-

LOCAL COMPETITORS

#?

MAP-PACK RANK

REPUTATION VS. SEARCH VISIBILITY

Reputation strength

Search visibility

THE DISCONNECT BETWEEN REPUTATION AND VISIBILITY

You hold a solid **4.6 rating across 85 reviews** in a fiercely competitive Tampa solar market. But that reputation is fighting uphill: a GoDaddy template still showing placeholder text and a broken self-describing schema undercut the credibility your license and NABCEP certs should be projecting.

Larger local players — Lunex Power (4.8, 600+), Tampa Bay Solar (4.7, 380+) — carry both the reviews and more polished, machine-legible sites. Your differentiator is a real lifetime warranty and licensed in-house electrician; right now that edge is barely visible at the moment a homeowner is searching.

07 ACCESSIBILITY & COMPLIANCE

SCORE 5 / 10 · INCLUDED BECAUSE IT'S BELOW THRESHOLD

A portion of your potential customers — and Google's own ranking systems — depend on an accessible site. We found gaps that are both a legal-exposure risk and a quiet ranking drag:

```
// accessibility & compliance probe
Image alt text ..... SPARSE    5 of 6 homepage images have alt; builder
decorative images thin
ARIA landmark roles ..... MINIMAL  GoDaddy builder divs
Colour-contrast (text vs bg) .... ADEQUATE
Privacy policy ..... ADEQUATE    /privacy-policy link present
Cookie consent notice ..... ABSENT
```

The leaking "filler@godaddy.com" account text is the priority cleanup — it's a trust and professionalism flag visible to every visitor, fixable in minutes.

08 THE 30-DAY PLAN

WEEK 1

Stop the bleeding

Purge every GoDaddy placeholder (filler@godaddy.com, the account-widget text) and rewrite the H1 to lead with Lifetime Warranty + NABCEP-certified + statewide.

WEEK 2

Fix the foundation

Repair the LocalBusiness JSON-LD (valid @id, full url) and surface the FL license, NABCEP cert and 67-county service area as structured, machine-readable data.

WEEK 3

Open the AI door

Add FAQ/QAPage schema and 40-60 word answer paragraphs for real Tampa solar queries (warranty, financing, panel brands) so assistants can quote you.

WEEK 4

Convert the win

Surface the 4.6 / 85 reviews on the homepage, add a sticky mobile call bar, and tighten the contact form into a quote-request CTA.

09 BOTTOM LINE

THE ONE THING THAT MATTERS MOST

SolarWise has the credentials of a market leader — a real FL license, NABCEP-certified installers and a lifetime warranty — sitting on a GoDaddy template that still leaks placeholder text and ships broken structured data. The single highest-leverage move is purging the placeholders and rebuilding the self-describing schema so the license and warranty become both human-obvious and machine-readable. In a Tampa market where rivals carry 400-600 reviews, turning that buried credibility into visible, quotable trust is what converts searchers into booked quotes.
