AGENT-BLINDAI-INVISIBLEA11Y-RISK

OVERALL GRADE

D

AVG 3.1 / 10

A ten-dimension audit of your website's ability to win customers across **search, mobile, AI assistants, and local discovery**. Every finding below is observed directly from your live site — nothing estimated.

02 DIMENSIONAL SCORING

Design / UX		3/10	Mobile Experience		5/10
Technical SEO		3/10	Local SEO		4/10
Content / E-E-A-T		2/10	AEO · Answer Engine		2/10
GEO · Generative		3/10	Agentic Readiness		2/10
Accessibility		3/10	CRO		4/10

Bars: **green** = strong (7–10) · **amber** = needs work (4–6) · **red** = critical (1–3). The three lowest dimensions are where you're losing the most customers right now — detailed on the following pages.

03 FORGE REPORT

▲ WHAT'S WORKING

- **Phone number is tap-to-call.** The number (318-725-4765) renders as a live tel: link in the nav — a mobile visitor can dial with one tap, which most GoDaddy template sites skip entirely.
- **Financing link is front and center.** The "SEE IF YOU PREQUALIFY" Synchrony Finance link is in the top nav, removing a major objection (cost) before the visitor even scrolls — a smart conversion nudge.
- **Social presence exists.** Active profiles on Facebook, Instagram, X, and Yelp are linked in the footer, giving off-site signals that the business is live and reachable.

▲ WHAT'S COSTING YOU LEADS NOW

- **Gallery images are broken — the entire visual portfolio is invisible.** All photo gallery images rendered as blank placeholders (base64 GIF stubs). A solar prospect who can't see your work has no reason to call. This is the single most damaging issue on the page.
- **The site's own H1 promotes generators, not solar.** The only H1 reads "Generac Generators YOU CAN AFFORD!" — Google reads this as a generator dealer, not a solar installer. Anyone searching "solar panels Shreveport" is ranking against a headline that doesn't match their intent.
- **No About page, no Contact page — both 404.** Attempting /contact and /about-us both return Page Not Found. There is no discoverable email, no physical address, no team info, and no licensing credentials anywhere on the site. Trust is the biggest purchase barrier in solar.
- **No reviews displayed on-site despite Yelp presence.** The site has zero customer quotes, stars, or testimonials — while Solar Alternatives and Griffin Electric both show verified review counts on third-party platforms that feed AI and Google snippets. Social proof is the fastest path from click to call in solar.

04 YOUR AI SEARCH BLIND SPOT

AEO + GEO · HOW MACHINES READ YOUR SITE

When a Shreveport homeowner asks ChatGPT or Google's AI Overview "**who installs solar panels in Shreveport?**", your site gives the model almost nothing it can surface. There is no FAQ schema, no answer-shaped paragraphs, and no structured entity data describing your service area, panel brands, or financing options.

Generative engines skip pages with no extractable answers and surface competitors whose content is structured for retrieval. As more solar shoppers start their research inside an AI assistant rather than a search result list, **this gap quietly removes Sunergy Solar from the very first conversation.**

COMBINED AI VISIBILITY

A blended index of how discoverable you are to answer engines, generative search, and autonomous agents — the AI layer that increasingly sits between customers and local businesses.

05 AGENTIC & FUTURE READINESS

CAN AN AUTONOMOUS AI AGENT ACTUALLY USE YOUR SITE?

AI agents that help homeowners compare solar quotes are already live in Shreveport search results. They pull installer name, service area, phone, certifications, and financing options automatically from the web page. We probed what an agent would find on thesunergy.com:

The site exposes a tap-to-call phone number in the nav, but there is no machine-readable NAP block, no llms.txt permissions file, no structured service area, and no NABCEP or contractor license data. **An AI agent evaluating solar installers would pass over this site** and move to a competitor it can actually read and quote.

```
// agent-access probe
Semantic HTML5 landmarks ..... MINIMAL   GoDaddy builder divs; no
section/article/aside roles
robots.txt bot permissions .... UNVERIFIED
llms.txt ..... ABSENT
Machine-readable NAP ..... ABSENT   No structured address or business entity
block
Tap-to-call & mailto hooks .... PARTIAL   tel: link present in nav; no mailto
anywhere
```

THE DISCONNECT BETWEEN REPUTATION AND VISIBILITY

Shreveport's solar market is anchored by Solar Alternatives Inc. — an EnergySage-verified installer founded in 2007 with a 4.6/5 rating across 10 platform reviews and a professional multi-page website. Griffin Electric LLC holds a 5.0/5 on EnergySage. **Sunergy Solar has no verifiable Google rating surfaced by search tools,** and the site itself shows zero reviews.

A Yelp profile exists for Sunergy Solar in Shreveport, and the solarreviews.com page mentions a customer who praised the business by name — **real satisfaction that is completely invisible on the actual website.** In a high-ticket purchase like solar, word of mouth stuck inside third-party profiles doesn't convert; it needs to live on the site.

07 ACCESSIBILITY & COMPLIANCE

SCORE 3 / 10 · INCLUDED BECAUSE IT'S BELOW THRESHOLD

A portion of your potential customers — and Google's own ranking systems — depend on an accessible site. We found gaps that are both a legal-exposure risk and a quiet ranking drag:

```
// accessibility & compliance probe
```

```
Image alt text ..... SPARSE    Several gallery images have no alt; others  
have generic descriptions
```

```
ARIA landmark roles ..... MINIMAL    GoDaddy builder outputs div-heavy markup  
with few semantic roles
```

```
Colour-contrast (text vs bg) .... ADEQUATE
```

```
Cookie consent notice ..... ABSENT
```

Priority fix: add descriptive alt text to all gallery images — it doubles as an SEO signal for Google Image Search and removes the accessibility gap in one pass.

08 THE 30-DAY PLAN

WEEK 1

Stop the bleeding

Fix all broken gallery images so prospects can see actual solar installations, and rewrite the H1 to lead with solar, not generators.

WEEK 2

Fix the foundation

Add a real Contact page (email, address, phone) and an About page with team bios and any NABCEP or contractor licensing info — the two pages a solar prospect always checks.

WEEK 3

Open the AI door

Add Organization + LocalBusiness JSON-LD schema, a FAQ section with answer paragraphs targeting Shreveport solar intent queries, and a service-area page naming Caddo and Bossier parishes.

WEEK 4

Convert the win

Pull real customer reviews onto the homepage, add a sticky mobile call bar, and surface financing details with a clear CTA — turning interest into booked estimates.

09 BOTTOM LINE

THE ONE THING THAT MATTERS MOST

Sunergy Solar's website is a near-empty GoDaddy template with a broken image gallery, a generator-focused headline, and no contact or about page — a serious credibility gap in a market where homeowners are spending \$20,000+. The single highest-leverage fix is repairing the gallery images and rewriting the H1 to lead with solar, which alone would stop the silent bounce of every mobile visitor who arrives and sees a blank page. Backing that with a real contact page and a handful of customer testimonials would move the site from invisible to competitive against Solar Alternatives in Shreveport's small but growing solar market.
