OVERALL GRADE

D+

AVG 4.1 / 10

A ten-dimension audit of your website's ability to win customers across **search, mobile, AI assistants, and local discovery**. Every finding below is observed directly from your live site — nothing estimated.

02 DIMENSIONAL SCORING

Design / UX		5/10	Mobile Experience		6/10
Technical SEO		3/10	Local SEO		3/10
Content / E-E-A-T		5/10	AEO · Answer Engine		2/10
GEO · Generative		3/10	Agentic Readiness		3/10
Accessibility		6/10	CRO		5/10

Bars: **green** = strong (7–10) · **amber** = needs work (4–6) · **red** = critical (1–3). The three lowest dimensions are where you're losing the most customers right now — detailed on the following pages.

VERIFIED DIMENSIONS

The four dimensions measured directly from your live site.

SCORE DISTRIBUTION

How all ten dimensions fall across the risk bands.

03 FORGE REPORT

WHAT'S WORKING

- **Responsive Wix foundation.** The template reflows on phones and exposes tap-to-call links — the mobile floor is intact. (Mobile 6)
- **Broad, clearly-listed services.** Tree care, landscaping, French drains, mowing, mulch and more each get a labeled section — a clear map of what you do.
- **Real reputation behind the business.** 4.4 stars across 39 Google reviews — genuine social proof most trade sites in the area can't match.

WHAT'S COSTING YOU LEADS NOW

- **The site lives on a free Wix subdomain.** dundirtcheaptulsa.wixsite.com/mysite isn't your own domain — it reads as temporary to homeowners and caps how high Google will rank you. (Tech SEO 3)
- **Contact is a gmail.com address.** dundirtcheaptulsa@gmail.com instead of name@yourdomain makes a 39-review company look like a side gig next to competitors on their own domain.
- **Everything is crammed onto one page.** A single long, keyword-stuffed page (title reads "tree service near me") means Google can't tell what you specialize in and visitors scroll a long way to book. (Local SEO 3)
- **No dedicated service or contact pages.** One-pager structure gives crawlers and AI assistants nothing granular to index or quote, and gives buyers no clean path to a quote.

04 YOUR AI SEARCH BLIND SPOT

AEO + GEO · HOW MACHINES READ YOUR SITE

When a Tulsa homeowner asks an AI assistant — ChatGPT, Gemini, or Google's AI overview — "who does tree removal and drainage near me?", your page gives the model almost nothing it can quote back. There's no FAQ schema, no answer-shaped paragraphs, and no clean structured data describing who you are and where you work.

The copy reads as marketing prose on a free subdomain, not extractable answers on an authoritative site, so generative engines skip past you toward competitors structured for retrieval. As more searches start inside an AI assistant, **this is the gap that quietly removes you from the conversation.**

```
// machine-readiness probe — answer & generative engines
FAQ / QAPage schema ..... ABSENT
Answer paragraphs (40-60 words) .... ABSENT
Entity / Organization JSON-LD ..... PARTIAL generic Wix markup; no clean business
entity
Service area structured data ..... ABSENT
```

COMBINED AI VISIBILITY

A blended index of how discoverable you are to answer engines, generative search, and autonomous agents — the AI layer that increasingly sits between customers and local businesses.

05 AGENTIC & FUTURE READINESS

CAN AN AUTONOMOUS AI AGENT ACTUALLY USE YOUR SITE?

A growing share of bookings will soon be placed by AI agents acting for a customer — pulling your phone, service area and hours automatically. We probed whether your site exposes that information in a machine-readable way:

Tap-to-call works, but with the business name, address and service area unstructured on a free subdomain, **an AI booking agent would struggle to confirm who and where you are** and move on to a competitor it can read cleanly. This door is open today and closing fast.

```
// agent-access probe
Semantic HTML5 landmarks ..... PARTIAL   Wix builder divs; few section/nav roles
robots.txt bot permissions .... UNVERIFIED
llms.txt ..... ABSENT
Machine-readable NAP ..... ABSENT   name / address / phone not structured
Tap-to-call & mailto hooks .... PRESENT
```

06 LOCAL COMPETITIVE POSITION

BUSINESS	GOOGLE	MOBILE CALL	SCHEMA / AI-READY	NAME / DOMAIN	OVERALL
Dun' Dirt Cheap (you)	4.4★ · 39	~	~	subdomain	D+
GreenPro Landscape and Design	4.9★ · 164	✓	~	✓	B-
Oklahoma Landscape	4.6★ · 117	✓	~	✓	B-
Tom's Outdoor Living	4.7★ · 217	✓	×	✓	C+

Google ratings & review counts are live data. Mobile-call, schema, and overall columns are illustrative — based on a first-pass look, not a full audit of each competitor's site.

THE DISCONNECT BETWEEN REPUTATION AND VISIBILITY

You hold a solid **4.4 rating across 39 reviews** — real proof of demand. Yet a free Wix subdomain, a gmail contact, and no local schema mean that reputation is effectively **invisible at the exact moment someone searches** for lawn or tree work in Tulsa.

Competitors with the same kind of reviews are on their own domains with clearer structure, so when Google and AI assistants pick who to surface, they win the impression you earned the hard way — through actual customers.

07 ACCESSIBILITY & COMPLIANCE

SCORE 6 / 10 · INCLUDED BECAUSE IT'S BELOW THRESHOLD

A portion of your potential customers — and Google's own ranking systems — depend on an accessible site. We found gaps that are both a legal-exposure risk and a quiet ranking drag:

```
// accessibility & compliance probe
Image alt text ..... ADEQUATE    template images carry alt text
ARIA landmark roles ..... MINIMAL
Colour-contrast (text vs bg) .... ADEQUATE
Privacy policy ..... UNVERIFIED
Cookie consent notice ..... PRESENT    Wix default banner
```

Accessibility is the least of the problems here — the structural fixes (own domain, real pages, schema) matter far more and lift ranking at the same time.

08 THE 30-DAY PLAN

WEEK 1

Get off the free subdomain

Register your own domain (e.g. dundirtcheap.com), point the Wix site to it, and set the canonical so ranking signal stops leaking.

WEEK 2

Look like a real company

Add a name@yourdomain email and a sticky tap-to-call bar so phone intent converts on mobile.

WEEK 3

Open the AI door

Add FAQ + Organization schema and structured NAP / service-area data so Google and AI assistants can quote you.

WEEK 4

Split the page & surface proof

Break the one-pager into focused service pages and put your 39 reviews on the homepage.

09 BOTTOM LINE

THE ONE THING THAT MATTERS MOST

Dun' Dirt Cheap has the reviews and service range to compete, but it sits on a free Wix subdomain with a gmail address that make a real company look temporary and keep it invisible to Google and AI assistants. The single highest-leverage move is moving onto an owned domain with structured contact and service data — converting a 4.4-star reputation that's currently buried into found, trackable inbound calls. Competitors like GreenPro and Oklahoma Landscape already have that foundation, so every month on the free subdomain widens the gap.
